END USER LICENSE AGREEMENT: For complete EULA information, go to www.zebra.com/eula.

Terms of Use

Proprietary Statement

This manual contains proprietary information of Zebra Technologies Corporation and its subsidiaries ("Zebra Technologies"). It is intended solely for the information and use of parties operating and maintaining the equipment described herein. Such proprietary information may not be used, reproduced, or disclosed to any other parties for any other purpose without the express, written permission of Zebra Technologies.

Product Improvements

Continuous improvement of products is a policy of Zebra Technologies. All specifications and designs are subject to change without notice.

Liability Disclaimer

Zebra Technologies takes steps to ensure that its published Engineering specifications and manuals are correct; however, errors do occur. Zebra Technologies reserves the right to correct any such errors and disclaims liability resulting therefrom.

Limitation of Liability

In no event shall Zebra Technologies or anyone else involved in the creation, production, or delivery of the accompanying product (including hardware and software) be liable for any damages whatsoever (including, without limitation, consequential damages including loss of business profits, business interruption, or loss of business information) arising out of the use of, the results of use of, or inability to use such product, even if Zebra Technologies has been advised of the possibility of such damages. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Warranty

For the complete Zebra hardware product warranty statement, go to: www.zebra.com/warranty.

Service Information

Before you use the unit, it must be configured to operate in your facility's network and run your applications.

If you have a problem using your equipment, contact your facility's Technical or Systems Support. If there is a problem with the equipment, they will contact the Zebra Global Customer Support at www.zebra.com/support.

For the latest version of this guide go to: www.zebra.com/support.

Provide Documentation Feedback

If you have comments, questions, or suggestions about this guide, send an email to EVM-Techdocs@zebra.com.

Configurations

MC3300x used in this guide refers to all configurations, except where noted. MC3300x-G refers to the Trigger configuration. MC3300x-R refers to the Rotate configuration. MC3300x-S refers to the Straight configuration.

MC3300x-G Features

Front View

Figure 1 MC3300x-G Front View

NOTE The MC3300x-G does not ship with a pre-installed hand strap. However, one can be purchased separately as a standalone accessory (SG-MC33-HDSTPG-01) if required.

Table 1 MC3300x-G Features - Front View

Number	Item	Function
1	Display	Displays all information needed to operate the MC3300x-G.
2	Charge /Application Notification LED or Scan/Decode Status	Indicates the battery charge state while charging, an application notification was received, or the scan/decode status.
3	Trigger	Initiates data capture when a scan application is enabled.
4	Battery Release Latch	Release the battery from the device.
5	Microphone	Use for communications in Handset mode.

Table 1 MC3300x-G Features - Front View (Continued)

Number	Item	Function
6	Power Key	Press to suspend and resume device. Provides the following options: Power off - Turn off the device. Restart - Reboot the device when software stops responding. Screenshot - Takes a snapshot of the current screen.
7	Keypad	Use to enter data and navigate on screen functions.
8	Scan Button	Initiates data capture when a scan application is enabled.

Back View

Figure 2 MC3300x-G Back View

Table 2 MC3300x-G Features - Back View

Number	Item	Function
10	Battery	Provides power for operating the device.
11	Battery Release Latch	Release the battery from the device.
12	Speaker	Provides audio output for video and music playback.

Table 2 MC3300x-G Features - Back View (Continued)

Number	Item	Function
13	Scanner Exit Window	Provides data capture using integrated scanner/imager option.
14	NFC Antenna	Provides communication with other NFC-enabled devices.

MC3300x-R Features

Rotating Scan Turret

The MC3300x-R features a Rotating Turret with three position stops. This feature offers greater scanning flexibility.

CAUTION Do not try to rotate the turret past the side position stops. Damage to device may occur.

Figure 3 MC3300x-R Rotating Turret

Front View

Figure 4 MC3300x-R Front View

Table 3 MC3300x-R Features - Front View

Number	Item	Function
1	Rotating Turret	Rotates for easy scanning positions.
2	Display	Displays all information needed to operate the MC3300x-R.
3	Charge /Application Notification LED or Scan/Decode Status	Indicates the battery charge state while charging, an application notification was received, or the scan/decode status.
4	Side Key Scan Button	Initiates data capture when a scan application is enabled.
5	Battery Release Latch	Release the battery from the device.
6	Power Key	Press to suspend and resume device. Provides the following options: Power off - Turn off the device. Restart - Reboot the device when software stops responding. Screenshot - Takes a snapshot of the current screen.

Back View

Figure 7 MC3300x-S Back View

Table 6 MC3300x-S Features - Back View

Number	Item	Function
9	Battery	Provides power for operating the device.
10	Battery Release Latch	Release the battery from the device.
11	Side Key Scan Button	Initiates data capture when a scan application is enabled.
12	Speaker	Provides audio output for video and music playback.
13	Scanner Exit Window	Provides data capture using the scanner.
14	NFC Antenna	Provides communication with other NFC-enabled devices.
15	Camera/Flash	Provides image capture capability with LED illumination.
16	Hand Strap	Use for securely holding the device. Comes pre-installed on every MC3300x-S & MC3300x-R device.

Setup

To start using the MC3300x for the first time:

- Install a microSD card (optional)
- Install the battery
- Charge the MC3300x
- Power on the MC3300x.

Installing a microSD Card

The microSD card slot provides secondary non-volatile storage. The slot is located under the battery pack. Refer to the documentation provided with the card for more information, and follow the manufacturer's recommendations for use.

CAUTION Follow proper electrostatic discharge (ESD) precautions to avoid damaging the microSD card. Proper ESD precautions include, but are not limited to, working on an ESD mat and ensuring that the operator is properly grounded.

1. Using a coin or finger, remove the microSD card cover.

Figure 8 Remove microSD Card Cover

2. Slide the microSD card holder to the Open position.

Figure 9 Unlock microSD Card Holder

3. Lift the microSD card holder.

Figure 10 Lift microSD Card Holder

4. Place the microSD card into the contact area with the contacts facing down.

Figure 11 Install microSD Card

5. Close the microSD card holder and slide the microSD card holder to the Lock position.

Figure 12 Lock microSD Card Holder

6. Replace the microSD card cover and ensure that it is installed properly.

Figure 13 Replace Cover

Installing the MC3300x-G Battery

The MC3300x-G is compatible with the following batteries:

- MC3300x 7000 mAh PowerPrecision+ extended battery
- MC33XX 5200 mAh PowerPrecision+ high capacity battery

To install the battery:

1. Loosen the hand strap (if installed).
2. Align the battery into the battery compartment.

Figure 14 Inserting the Battery

3. Slide the front of the battery into the battery compartment.
4. Press battery down firmly. Ensure that both battery release buttons on the sides of the MC3300x-G return to the home position.

Figure 15 Press Battery Down

5. Tighten the hand strap (if installed).
6. Press and hold the Power key (until you see a Zebra splash screen) to turn on the device.

Installing the MC3300x-R/S Battery

The MC3300x-R/S is compatible with the following batteries:

- MC3300x 7000 mAh PowerPrecision+ extended battery
- MC33XX 5200 mAh PowerPrecision+ high capacity battery
- MC33XX 2740 mAh PowerPrecision+ standard battery

To install the battery:

1. Loosen the hand strap, if needed.
2. Align the battery into the battery compartment.

Figure 16 Inserting the Battery

3. Slide the front of the battery into the battery compartment.
4. Press battery down firmly. Ensure that both battery release buttons on the sides of the MC3300x-R/S return to the home position.

Figure 17 Press Battery Down

5. Tighten the hand strap, if needed.
6. Press and hold the Power key (until you see a Zebra splash screen) to turn on the device.

Replacing the Battery in the MC3300x-G

1. Push in the two Battery Release buttons.

The battery ejects slightly. With Hot Swap mode, when the user removes the battery, the display turns off and the device enters low power state. The MC3300x-G supports wireless connectivity persistence for 30 sec (indicated by flashing Amber LEDs), followed by RAM data persistence for approximately five minutes. Replace the battery within five minutes to preserve memory persistence.

Figure 18 Release Battery

2. Remove the battery from the battery compartment.

Figure 19 Remove Battery

3. Align the battery into the battery compartment.

Figure 20 Inserting the Battery

4. Slide the front of the battery into the battery compartment.
5. Press battery down firmly. Ensure that both battery release buttons on the sides of the MC3300x-G return to the home position.

Figure 21 Press Battery Down

6. The device automatically resumes after a battery removal and installation (in a hot swap change). The only time the Power key needs to be pressed is if the device has been powered off or left for a prolonged duration without a battery pack.

Replacing the Battery in the MC3300x-R/S

1. Push in the two Battery Release buttons.

The battery ejects slightly. With Hot Swap mode, when the user removes the battery, the display turns off and the device enters low power state. The MC3300x-R/S supports wireless connectivity persistence for 30 sec (indicated by flashing Amber LEDs), followed by RAM data persistence for approximately five minutes. Replace the battery within five minutes to preserve memory persistence.

Figure 22 Release Battery

2. Remove the battery from the battery compartment.

Figure 23 Remove Battery

3. Align the battery into the battery compartment.

Figure 24 Inserting the Battery

4. Slide the front of the battery into the battery compartment.
5. Press battery down firmly. Ensure that both battery release buttons on the sides of the MC3300x-R/S return to the home position.

Figure 25 Press Battery Down

6. The device automatically resumes after a battery removal and installation (in a hot swap change). The only time the Power key needs to be pressed is if the device has been powered off or left for a prolonged duration without a battery pack.

Compatibility

The table below displays compatibility with MC3300x, MC33XX and MC3200 mobile computers and accessories.

Table 7 Compatibility

	MC3300x PP+ Battery	MC33 Series PP+ Batteries	MC32N0 PP Batteries	MC33XX Cradles	MC32N0 Cradles	MC33XX Battery Charger	MC32N0 Battery Charger
MC3300x mobile computer	Yes	Yes	No	Yes	Yes w/adapter	N/A	N/A
MC33XX mobile computer	No	Yes	Yes	Yes	Yes w/adapter	N/A	N/A
MC32N0 mobile computer	No	No	Yes	No	Yes	N/A	N/A
MC3300x PP+ battery	N/A	N/A	N/A	Yes	No	Yes	No
MC33 Series PP+ Batteries	N/A	N/A	N/A	Yes	No	Yes	No
MC32N0 PP Batteries	N/A	N/A	N/A	Yes	Yes	Yes	Yes

- MC3300x mobile computers are only compatible with MC33 PowerPrecision+ batteries.
- MC33XX mobile computers are compatible with all batteries (MC33XX PowerPrecision+ and MC32N0 PowerPrecision).
- MC3300x / MC33XX mobile computers are compatible with all cradles.
An additional adapter is needed to use the MC32N0 terminal cradles, which provides charge only (no communication support).
- MC33XX battery chargers are compatible with all (MC3300x/MC33XX PowerPrecision+ and MC32N0 PowerPrecision) batteries.
- MC32N0 mobile computers are not compatible with MC33XX cradles.

Battery Comparison

The table below displays a comparison of the MC3300x, MC33XX and the MC32XX batteries.

Table 8 Battery Comparison

Feature	MC32N0	MC33XX	MC3300x
Battery Type	PowerPrecision	PowerPrecision+	PowerPrecision+
Includes Zebra and PowerPrecision+ recessed logos	No	Yes	Yes
Back Label	Grey	Blue	Black

Battery Compatibility

- MC3300x-G is compatible with the 7000mAh extended capacity & 5200mAh high capacity PowerPrecision+ batteries.
- MC3300x-R/S is compatible with the 7000mAh extended capacity, 5200mAh high capacity & 2740mAh standard capacity PowerPrecision+ batteries.
- MC3300x devices are not compatible with the legacy MC32N0 PowerPrecision batteries.

The following re-occurring message will be displayed if the incorrect battery is used with the MC3300x device. Please make sure you use one of the MC33XX compatible batteries.

NOTE The battery notification (shown above) cannot be disabled or suppressed on the MC3300x handheld device. Please make sure you use the appropriate MC33 PP+ batteries with the MC3300x device.

Charging the MC3300x

Use one of the following accessories to charge the MC3300x and/or spare battery.

Table 9 Charging and Communication

Description	Part Number	Charging		Communication	
		Battery (In Device)	Spare Battery	USB	Ethernet
1-Slot USB Charge Cradle with Spare Battery Charger	CRD-MC33-2SUCHG-01	Yes	Yes	Yes	No
5-Slot Charge Only ShareCradle	CRD-MC33-5SCHG-01	Yes	No	No	No
5-Slot Ethernet ShareCradle	CRD-MC33-5SETH-01	Yes	No	No	Yes
5-Slot Charge ShareCradle with 4-Slot Battery Charger	CRD-MC33-4SC4BC-01	Yes	Yes	No	No
5-Slot Ethernet ShareCradle with 4-Slot Battery Charger	CRD-MC33-4SE4BC-01	Yes	Yes	No	Yes
4-Slot Spare Battery Charger	SAC-MC33-4SCHG-01	No	Yes	No	No
20-Slot Spare Battery Charger	SAC-MC33-20SCHG-01	No	Yes	No	No
USB Charge Cable	CBL-MC33-USBCHG-01	Yes	No	Yes	No
MC32N0 1-Slot Cradle with MC33XX Cradle Adapter	CRD3000-1001RR ADP-MC33-CRDCUP-01	Yes	Yes (Only charges MC32N0 batteries in the spare battery slot)	Yes	No

NOTE Ensure that you follow the guidelines for battery safety described in the MC3300x Product Reference Guide.

1. To charge the main battery, connect the charging accessory to the appropriate power source.
2. Insert the MC3300x into a cradle or attach to a USB charge cable. The MC3300x turns on and begins charging. The Charging/Notification LED remains amber while charging, then turns solid green when fully charged.

NOTE To function properly, ensure that the MC3300x handstrap, if attached, does not interfere with the charging contacts when the MC3300x is inserted into a charging cradle.

Charging Temperature

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device or cradle always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device or cradle may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device and cradle indicates when charging is disabled due to abnormal temperatures via its LED.

Charging the Spare Battery

1. Insert a spare battery into the spare battery slot.
2. Ensure the battery is seated properly.

The Spare Battery Charging LED blinks indicating charging. See [Table 10](#) for charging indicators.

Table 10 Charging/Notification LED Indicators

State	Indication
Off	• The battery is not charging. • The battery is not inserted correctly in the cradle or connected to a power source. • Cradle is not powered.
Blinking Amber	• Active wireless connectivity session during battery hot swap.
Solid Amber	• Battery is charging.
Solid Green	• Battery charging is complete.
Fast Blinking Red 2 blinks/second	Charging error, e.g.: • Temperature is too low or too high. • Charging has gone on too long without completion (typically eight hours).
Solid Red	• Spare battery is charging and battery is at the end of useful life. • Charging complete and battery is at the end of useful life.
Blinking Blue	• Indicates an application notification was received.

1-Slot USB Charge Cradle

The 1-Slot USB Charge Cradle:

- Provides 9 VDC power for charging the mobile computer and charging the battery.
- Provides 4.2 VDC power to charge the spare battery.
- Provides a USB port for data communication between the mobile computer and a host computer or other USB devices (e.g., a printer).
- Synchronizes information between the mobile computer and a host computer. With customized or third party software, it can also synchronize the mobile computer with corporate databases.

Compatible with the following batteries (charging in a device):

- MC3300x 7000mAh PowerPrecision+ extended capacity battery
- MC33XX 5200mAh PowerPrecision+ high capacity battery
- MC33XX 2740mAh PowerPrecision+ standard capacity battery (MC3300x-R/S & MC33XX-R/S only)

Compatible with the following batteries (charging in a spare battery slot only):

- MC3300x 7000mAh PowerPrecision+ extended capacity battery
- MC33XX 5200mAh PowerPrecision+ high capacity battery
- MC33XX 2740mAh PowerPrecision+ standard capacity battery
- MC32N0 5200mAh PowerPrecision high capacity battery
- MC32N0 2740mAh PowerPrecision standard capacity battery

NOTE To function properly, ensure that the MC3300x handstrap, if attached, does not interfere with the charging contacts when the MC3300x is inserted into a charging cradle.

Figure 26 1-Slot USB Charge Cradle

5-Slot Charge Only ShareCradle

The 5-Slot Charge Only ShareCradle:

- Provides 9 VDC power for operating the mobile computer and charging the battery.
- Simultaneously charges up to five mobile computers.

Compatible with the following batteries (charging in a device):

- MC3300x 7000mAh PowerPrecision+ extended capacity battery
- MC33XX 5200mAh PowerPrecision+ high capacity battery
- MC33XX 2740mAh PowerPrecision+ standard capacity battery (MC3300x-R/S & MC33XX-R/S only)

NOTE To function properly, ensure that the MC3300x handstrap, if attached, does not interfere with the charging contacts when the MC3300x is inserted into a charging cradle.

Figure 27 5-Slot Charge Only ShareCradle

5-Slot Ethernet ShareCradle

The 5-Slot Ethernet ShareCradle:

- Provides 9 VDC power for operating the mobile computer and charging the battery.
- Simultaneously charges up to five mobile computers.

Compatible with the following batteries (charging in a device):

- MC3300x 7000mAh PowerPrecision+ extended capacity battery
- MC33XX 5200mAh PowerPrecision+ high capacity battery
- MC33XX 2740mAh PowerPrecision+ standard capacity battery (MC3300x-R/S & MC33XX-R/S only)

NOTE To function properly, ensure that the MC3300x handstrap, if attached, does not interfere with the charging contacts when the MC3300x is inserted into a charging cradle.

Figure 28 5-Slot Ethernet ShareCradle

5-Slot ShareCradle with 4-Slot Battery Charger

The 5-Slot ShareCradle with 4-Slot Battery Charger:

- Provides 9 VDC power for operating the mobile computer and charging the battery.
- Provides 4.2 VDC power for charging spare batteries.
- Simultaneously charges up to four mobile computers and four spare batteries.

Compatible with the following batteries (charging in a device):

- MC3300x 7000mAh PowerPrecision+ extended capacity battery
- MC33XX 5200mAh PowerPrecision+ high capacity battery
- MC33XX 2740mAh PowerPrecision+ standard capacity battery (MC3300x-R/S & MC33XX-R/S only)

Compatible with the following batteries (charging in a spare battery slot only):

- MC3300x 7000mAh PowerPrecision+ extended capacity battery
- MC33XX 5200mAh PowerPrecision+ high capacity battery
- MC33XX 2740mAh PowerPrecision+ standard capacity battery
- MC32N0 5200mAh PowerPrecision high capacity battery
- MC32N0 2740mAh PowerPrecision standard capacity battery

NOTE To function properly, ensure that the MC3300x handstrap, if attached, does not interfere with the charging contacts when the MC3300x is inserted into a charging cradle.

Figure 29 5-Slot ShareCradle with 4-Slot Battery Charger

5-Slot Ethernet ShareCradle with 4-Slot Battery Charger

The 5-Slot Ethernet ShareCradle with 4-Slot Battery Charger:

- Provides 9 VDC power for operating the mobile computer and charging the battery.
- Provides 4.2 VDC power for charging spare batteries.
- Simultaneously charges up to four mobile computers and four spare batteries.

Compatible with the following batteries (charging in a device):

- MC3300x 7000mAh PowerPrecision+ extended capacity battery
- MC33XX 5200mAh PowerPrecision+ high capacity battery
- MC33XX 2740mAh PowerPrecision+ standard capacity battery (MC3300x-R/S & MC33XX-R/S only)

Compatible with the following batteries (charging in a spare battery slot only):

- MC3300x 7000mAh PowerPrecision+ extended capacity battery
- MC33XX 5200mAh PowerPrecision+ high capacity battery
- MC33XX 2740mAh PowerPrecision+ standard capacity battery
- MC32N0 5200mAh PowerPrecision high capacity battery
- MC32N0 2740mAh PowerPrecision standard capacity battery

NOTE To function properly, ensure that the MC3300x handstrap, if attached, does not interfere with the charging contacts when the MC3300x is inserted into a charging cradle.

Figure 30 5-Slot Ethernet ShareCradle with 4-Slot Battery Charger

4-Slot Spare Battery Charger

The 4-Slot Battery Charger:

- Charges up to four MC3300x spare batteries.
- Provides 4.2 VDC power to charge the spare battery.

Compatible with the following batteries (charging in a spare battery slot only):

- MC3300x 7000mAh PowerPrecision+ extended capacity battery
- MC33XX 5200mAh PowerPrecision+ high capacity battery
- MC33XX 2740mAh PowerPrecision+ standard capacity battery
- MC32N0 5200mAh PowerPrecision high capacity battery
- MC32N0 2740mAh PowerPrecision standard capacity battery

Figure 31 4-Slot Spare Battery Charger

20-Slot Spare Battery Charger

The 20-Slot Battery Charger:

- Charges up to twenty MC3300x spare batteries.
- Provides 4.2 VDC power to charge the spare battery.

Compatible with the following batteries (charging in a spare battery slot only):

- MC3300x 7000mAh PowerPrecision+ extended capacity battery
- MC33XX 5200mAh PowerPrecision+ high capacity battery
- MC33XX 2740mAh PowerPrecision+ standard capacity battery
- MC32N0 5200mAh PowerPrecision high capacity battery
- MC32N0 2740mAh PowerPrecision standard capacity battery

Figure 32 20-Slot Spare Battery Charger

USB Charge Cable

The USB Charge Cable:

- Provides 5 VDC power to charge the battery.
- Provides power and/or communication with the host computer over USB to the device.
- Compatible with devices using the following batteries:
 - MC3300x 7000 mAh PowerPrecision+ extended capacity battery
 - MC33XX 5200 mAh PowerPrecision+ high capacity battery
 - MC33XX 2740 mAh PowerPrecision+ standard capacity battery (MC3300x-R/S & MC33XX-R/S only)

NOTE To function properly, ensure that the MC3300x handstrap, if attached, does not interfere with the charging contacts when the MC3300x is inserted into a charging cradle or cable.

Figure 33 USB Charge Cable

MC33XX Charge Only Adapter

Use the MC33XX Charge Only Adapter for backwards compatibility with the MC32N0 cradles and the MC33XX or MC3300x mobile computer. The MC33XX Charge Only Adapter is compatible with both the MC33XX and the MC3300x mobile computers for charge only (no communication) on the legacy MC32N0 1-Slot and 4-Slot cradles.

- MC33XX Charge Only Adapter supports the MC32N0 1-Slot USB Cradle, MC32N0 4-Slot Charge Only Cradle, and MC32N0 4-Slot Ethernet Cradle.
- MC33XX Charge Only Adapter provides charge only; no communication when used with the MC32N0 cradles.
- MC32N0 1-Slot USB Cradle provides 5.4 VDC to charge the device.
- MC32N0 1-Slot USB Cradle (with the MC33XX Charge Only Adapter) is compatible with an MC33XX or MC3300x mobile computer charging either MC33XX or MC3300x PowerPrecision+ batteries or MC32N0 PowerPrecision batteries, but the MC32N0 1-Slot USB Cradle spare battery slot is only compatible with MC32N0 PowerPrecision batteries.

MC33XX Charge Only Adapter Installation

To install the MC33XX Charge Only Adapter:

1. Clean the MC32N0 cradle and contacts with an alcohol wipe, using a back and forth motion with your finger.
For more information about cleaning, refer to the Maintenance and Troubleshooting chapter of the MC33XX Mobile Computer User Guide.

Figure 34 Clean MC32N0 Cradle

2. Peel and remove the adhesive from the back of the adapter.

Figure 35 Peel and Remove Adhesive

3. Insert the adapter into the MC32N0 cradle and adhere to the bottom of the cradle.

Figure 36 Insert Adapter into Cradle and Adhere

4. Insert the MC33XX or MC3300x mobile computer into the MC32N0 cradle.

Figure 37 Insert MC33XX or MC3300x into MC32N0 Cradle

NOTE To function properly, ensure that the MC3300x handstrap, if attached, does not interfere with the charging contacts when the MC3300x is inserted into a charging cradle.

Scanning

The MC3300x offers the following data capture options:

- Imager:
 - SE4720 1D/2D
 - SE4770 1D/2D
 - SE4850-ER 1D/2D
- Laser Scanner:
 - SE965 1D

Refer to the MC3300x Mobile Computer Product Reference Guide for other scanning options.

Barcode Capture with Imager

To capture barcode data:

1. Ensure that an application is open on the device and a text field is in focus (text cursor in text field).
2. Point the top of the device at a barcode.
3. Press and hold the Scan button or Trigger.

The red laser aiming pattern turns on to assist in aiming.

4. Ensure the barcode is within the area formed by the cross-hairs in the aiming pattern. The aiming dot is used for increased visibility in bright lighting conditions.

The Scan LEDs light green and a beep sounds, by default, to indicate the barcode was decoded successfully. Note that when the device is in Pick List Mode, the device does not decode the barcode until the center of the crosshair touches the barcode.

Figure 38 Aiming Pattern: Standard and Extended Range

Figure 39 Pick List Mode with Multiple Barcodes in Aiming Pattern: Standard and Extended Range

5. Release the scan button or Trigger.
6. The barcode content data appears in the text field.

Barcode Capture with Laser Scanner

To capture barcode data:

1. Ensure that an application is open on the device and a text field is in focus (text cursor in text field).
2. Point the top of the device at a barcode.
3. Point the scan exit window at a bar code.
4. Press and hold the Scan button.

The red scan line turns on to assist in aiming. Ensure that the scan line crosses every bar and space of the barcode.

The Scan LEDs light green and a beep sounds, by default, to indicate the barcode was decoded successfully.

5. Release the scan button.
6. The captured data appears in the text field.

Ergonomic Considerations

Taking breaks and task rotation is recommended.

Optimize Body Posture for Low Scanning

Figure 41 Low Scanning

Alternate left and right knees.

Optimize Body Posture for High Scanning

Figure 42 High Scanning

Alternate left and right hand.

Avoid Bending
